## Letters of Transmittal

His Honour, The Honourable Dr. Gordon L. Barnhart  
Lieutenant Governor of the Province of Saskatchewan

May it Please Your Honour:

I have the honour to submit herewith the Annual Report of the Pension Plan for the Employees of the Saskatchewan Workers' Compensation Board for the year ending December 31, 2010.

Don Morgan, Q.C.  
Minister Responsible for the  
Pension Plan for the Employees of the  
Saskatchewan Workers' Compensation Board

The Honourable Don Morgan, Q.C.  
Minister Responsible for the  
Pension Plan for the Employees of the  
Saskatchewan Workers' Compensation Board

Sir:

I have the honour to submit the Annual Report of the Pension Plan for the Employees of the Saskatchewan Workers' Compensation Board for the period January 1, 2010 to December 31, 2010.

David Eberle  
Chairman  
The Workers' Compensation Board

---

# Pension Plan for the Employees of the Saskatchewan Workers' Compensation Board

## Introduction

The primary purpose of the Plan is to provide pension benefits to employees in the event of retirement and secondarily in the event of termination of employment. The Plan also provides benefits to the dependents of deceased employees and superannuates in the event of death either prior, or subsequent, to retirement.

The Workers' Compensation Board is the Administrator of the Plan.

## Operation of the Plan

This Plan is a Defined Benefit pension plan, which provides a benefit based on an employee's highest earnings during specified periods taking into consideration their total years of service to a maximum of 35 years. Currently employees

who are contributing to the Plan make contributions at a rate of 7%, 8% or 9%, depending on their age when they entered the Plan. This contribution is offset by an amount equal to 1.8% of their pensionable earnings between the Year's Basic Exemption and Year's Maximum Pensionable Earnings as defined on an annual basis by the Canada Pension Plan.

Any deficiencies in the Plan are paid out of the revenues of the Workers' Compensation Board and are a charge thereon.

The following table below shows the number of active and retired employees in the Plan as of the current and prior year-ends:

	<b>December 31, 2010</b>	<b>December 31, 2009</b>
Active Employees	18	24
Inactive Members	1	2
Retired Employees *	68	63
<b>Totals</b>	<b>87</b>	<b>89</b>
*Includes Superannuates, plus their dependents that are now in receipt of a survivor pension.		

## Benefit Payments

During the Plan year, benefit payments are made in accordance with the Plan rules due to retirement of employees, termination of employment and death benefits – either due to death of an employee or a superannuate.

## Contributions to the Plan

In accordance with the contribution rates outlined, employee contributions to the Plan during the year totaled \$55,824. This compares to \$76,883 for the previous fiscal year.

### Retirement Summary

	December 31, 2010	December 31, 2009
Attained Age 65	-	-
Attained Age 60 – no reduction	-	-
Attained 35 years of Service	6	7
Age 55 and 30 years service – reduced pension	-	-
Ill Health Pensions	-	-
Deferred Allowances now payable	1	-
Early Retirement Allowances	-	-
<b>Totals</b>	<b>7</b>	<b>7</b>

### Death Benefit Summary

	December 31, 2010	December 31, 2009
Employee Survivor Pension	-	-
Superannuate Survivor Pension	-	2
<b>Totals</b>	<b>-</b>	<b>2</b>

### Termination of Employment Summary

	December 31, 2009	December 31, 2008
Deferred Pension	-	-
Cash Refund	-	-
Reciprocal Transfer	-	-
<b>Totals</b>	<b>-</b>	<b>-</b>

Detailed listings of all transactions are included at the end of this report.

## Investment Performance

The Workers' Compensation Board (Board) is responsible for holding in trust and investing the monies in the Plan. The Board has retained Greystone Capital Management Inc. to be the investment manager.

The investment manager makes the day-to-day decision of whether to buy or sell specific investments in order to achieve the long-term investment performances set out by the Board in their Investment Policy Statement for the Pension Plan for the Employees of the Saskatchewan Workers' Compensation Board. It is against these long-term investment performance objectives that the Board assesses the performance of the investment manager.

The Plan's long-term investment performance objective is to outperform a benchmark portfolio constructed as follows:

Asset Class	Market Index	Weight
Canadian	S&P/TSX Composite CPMS CAP 10 Index	25%
US	S&P 500 US Stock Index	12.5%
Non-North American	MSCI EAFE Index	12.5%
Fixed Income Bonds	SCM Universe Bond Index	45%
Short-Term Investments	91 Day Canadian Treasury Bill	5%
<b>Total</b>		<b>100%</b>

The objective of the Plan is to achieve a return that is equal to or greater than the return achieved from this benchmark portfolio over a rolling four-year period. The performance history of the Plan as of December 31, 2010 has been:

	1-Year Return	Rolling 4 Year Average
Plan's Return	10.6%	2.9%
Target Return	9.0%	2.5%

## Administration

The Public Employees Benefits Agency (PEBA) has responsibility for the operation, administration and management of several superannuation plans and other employee benefits programs. Administration of the Pension Plan for the Employees of the Saskatchewan Workers' Compensation Board is carried out in conjunction with similar plans administered by PEBA.

Changes to administrative processes will continue to be evaluated with the intent of identifying opportunities for improving customer service and becoming more responsive to the needs of the Board and the membership.

---

# Management's Report

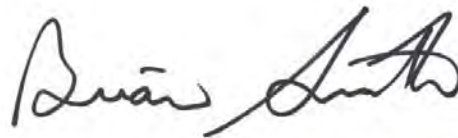

To the Members of the Legislative Assembly of Saskatchewan

Administration of the Plan is presently assigned to the Public Employees Benefits Agency of the Ministry of Finance. Management is responsible for financial administration, administration of the funds and managing of assets.

The financial statements, which follow, have been prepared by management in conformity with Canadian generally accepted accounting principles. Management uses internal controls and exercises its best judgment in order that the financial statements reflect fairly the financial position of the Plan.

The present value of accrued pension benefits has been determined by an actuarial valuation. The actuaries' opinion follows. Actuarial valuation reports require management's best estimate assumptions about future events.

The financial statements have been audited by KPMG LLP, Chartered Accountants, whose report follows.

Brian Smith  
Assistant Deputy Minister  
Public Employees Benefits Agency

Ann Mackrill  
Director, Pension Programs  
Public Employees Benefits Agency

Kathy Deck, CGA  
Director, Financial Services  
Public Employees Benefits Agency

Regina, Saskatchewan  
April 6, 2011

---

## Actuaries' Opinion

The Segal Company Ltd. was retained by the Saskatchewan Workers' Compensation Board (the Board) to perform actuarial valuations of the assets and liabilities of the Pension Plan for the Employees of the Saskatchewan Workers' Compensation Board (the Plan) on an accounting basis as at December 31, 2009 and extrapolated to December 31, 2010 for inclusion in the Annual Report with respect to the Plan for the year ended December 31, 2010.

The valuation of the Plan's actuarial assets and liabilities were based on:

- Membership data provided by the Board as at December 31, 2009;
- Asset data provided by the Board as at December 31, 2010;
- Methods prescribed by the Canadian Institute of Chartered Accountants for pension plan financial statements; and
- Assumptions about future events (economic and demographic) that were developed by management and The Segal Company Ltd. and are considered as management's best estimate of these events.

While the actuarial assumptions used to estimate liabilities for the Plan's financial statements contained in the Annual Report represent management's best estimate of future events, and while in our opinion these assumptions are reasonable, the Plan's future experience will differ from the actuarial assumptions. Emerging experience differing from the assumptions will result in gains or losses that will be revealed in future valuations, and will affect the financial position of the Plan.

We have tested the data for reasonableness and consistency with prior valuations and in our opinion the data is sufficient and reliable for the purposes of the valuation. We also believe that the methods employed in the valuation and the assumptions used are, in aggregate, appropriate. Our opinions have been given and our valuation has been performed in accordance with accepted actuarial practice.

Phil Rivard, FSA, FCIA  
The Segal Company Ltd.

# Independent Auditors' Report

To the Members of the Legislative Assembly Province of Saskatchewan

We have audited the accompanying financial statements of the Pension Plan for the Employees of the Saskatchewan Workers' Compensation Board, which comprise the statement of net assets available for benefits, accrued pension benefits and deficit as at December 31, 2010, the statements of changes in net assets available for benefits and changes in accrued pension benefits for the year then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

## *Management's Responsibility for the Financial Statements*

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian generally accepted accounting principles, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

## *Auditor's Responsibility*

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform an audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

## *Opinion*

In our opinion, the financial statements present fairly, in all material respects, the net assets available for benefits and the accrued pension benefits and deficit of the Pension Plan for the Employees of the Saskatchewan Workers' Compensation Board as at December 31, 2010, and the changes in net assets available for benefits and changes in accrued pension benefits for the year then ended in accordance with Canadian generally accepted accounting principles.

# Pension Plan For The Employees Of The Saskatchewan Workers' Compensation Board Notes to the Financial Statements

December 31, 2010

## 1. Description of the Plan

### a) General

The Pension Plan for the Employees of The Saskatchewan Workers' Compensation Board (the Plan) is a defined benefit final average pension plan established under *The Workers' Compensation Board Pension Implementation Act*. This Plan replaces the Workers' Compensation Board Superannuation Plan (former plan). Membership is comprised of employees and board members who were enrolled in the former plan on October 1, 1977 and who did not elect to transfer to the Public Employees Pension Plan prior to October 1, 1978. The description of the Plan is a summary only. For complete information reference should be made to the plan text.

### b) Administration

The Workers' Compensation Board (WCB) administers the Plan. Day-to-day administration is provided by the Public Employees Benefits Agency (PEBA). The WCB has established a trust fund for the Plan and appointed RBC Dexia Investor Services as the Trustee.

### c) Superannuation Plan

The Plan was established to accumulate contributions paid by employees and the employer, as well as any investment income.

Superannuation allowances and refunds of contributions together with interest are paid out of the Plan.

### d) Funding policy

Members contribute at the rate of 7%, 8% or 9% of salary depending on their age at the date of the commencement with the Plan. Contributions are reduced by an amount equal to deemed Canada Pension Plan contributions.

The contributions required to be paid by the employer are calculated by applying a predetermined rate to the members' contributions.

### e) Retirement

Normal retirement is at age 65. Members who retire may receive benefit payments earlier under the following conditions:

- at any age after 35 years of service,
- at age 60 with at least 20 years of service,
- at age 60 with between 15 years and 20 years of service with a reduced pension,
- at age 55 with at least 30 years of service with a reduced pension.

f) Pension

The lifetime annual pension payable to a member is 2.0% of the average salary received by the member during the five years of highest salary, multiplied by the total number of years of service. The maximum number of years of service is 35 years. At age 65, a member's pension is reduced due to integration with the Canada Pension Plan.

g) Income taxes

The Plan is a registered pension plan as defined in *The Income Tax Act* and is not subject to income taxes. Superannuation allowances paid from the Plan are subject to source income tax deductions that are deducted by RBC Dexia Investor Services and remitted to Canada Revenue Agency.

## 2. Significant Accounting Policies

The financial statements are prepared in accordance with Canadian generally accepted accounting principles. The following accounting policies are considered significant.

### *Basis of presentation*

These financial statements are prepared on a going concern basis and present the financial position of the Plan as a separate entity independent of WCB and Plan members. They are prepared to assist Plan members and others in reviewing the activities of the Plan for the fiscal period, but they do not portray the funding requirements of the Plan or the benefit security of individual plan members.

### *Investments*

Short-term investments, bonds and debentures, equities and pooled funds are recorded at fair value, based on year-end market closing prices. Transactions are recorded as of the trade date.

### *Change in fair value of investments*

The change in fair value of investments reflects the current year's change in unrealized gains and losses on investments.

### *Investment transactions and income*

Investment transactions are recorded on the trade date. Investment income, which is recorded on an accrual basis, includes interest income, dividends, pooled fund distributions and net gains or losses from the sale of securities. Monetary items denominated in foreign currency are translated at the exchange rate in effect at year end. Gains and losses resulting from translations are included in the change in fair value of investments. Brokers' commission and other transaction costs are recognized in the statement of changes in net assets available for benefits.

### *Use of estimates*

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the recorded amounts of revenue and expenses during the year. Significant items subject to such estimates and assumptions include the valuation of investments and accrued pension benefits. Actual results could differ from these estimates.

### Future accounting policy changes

Effective January 1, 2011, the Plan will adopt section 4600 of the CICA Handbook which replaces section 4100. This section provides guidance on the measurement of the Plan's pension obligation and any investments held by the Plan. This section also provides the Plan with the ability to select and follow International Financial Reporting Standards (IFRS) or Accounting Standards for Private Enterprises for all other accounting policies.

The Plan will follow IFRS as that is the set of accounting standards that will be adopted by the Plan sponsor, WCB. At this time management does not expect there to be a significant impact on the Plan's financial statements.

### 3. Investments

#### a) Short-term investments

Short-term investments are comprised of T-Bills, notes and commercial paper with effective interest rates of 0.9% to 1.2% (2009 – 0.1% to 0.4%) and an average remaining term to maturity of 38 (2009 - 64) days. The Plan's investment policy states that investments must meet a minimum investment standard of "R-1" rating, as rated by a recognized credit rating service. Other than the Government of Canada no single issuer represents more than 36% of the fair value (2009 – 8.76%) of the short-term investment portfolio.

#### b) Bonds and debentures

The Plan's investment policy states that bonds and debentures must meet a minimum quality standard of BBB as rated by a recognized credit rating service. No more than 15% of the bond portfolio may be invested in BBB rated bonds. As at December 31, 2010, the Plan held 5.71% (2009 – 5.26%) of its portfolio in BBB bonds.

#### 2010 (thousands of \$)

Years to Maturity	Federal	Provincial	Municipal	Corporate	Total	Yield to Maturity at Market	Coupon Rate
Under 5	\$3,184	\$ -	\$ -	\$1,835	\$ 5,019	1.4-6.6%	2.8-6.8%
5 – 10	718	1,496	587	2,678	5,479	3.4-7.0%	3.5-11.0%
Over 10	1,038	1,553	76	1,524	4,191	3.2-6.3%	3.3-8.8%
<b>Fair Value</b>	<b>\$4,940</b>	<b>\$3,049</b>	<b>\$663</b>	<b>\$6,037</b>	<b>\$14,689</b>		

#### 2009 (thousands of \$)

Years to Maturity	Federal	Provincial	Municipal	Corporate	Total	Yield to Maturity at Market	Coupon Rate
Under 5	\$3,210	\$ 277	\$ -	\$3,276	\$ 6,763	0.5-6.8%	2.7-6.8%
5 – 10	218	1,260	504	1,529	3,511	3.7-7.1%	3.8-11.0%
Over 10	761	1,940	70	1,822	4,593	4.1-7.1%	4.0-8.8%
<b>Fair Value</b>	<b>\$4,189</b>	<b>\$3,477</b>	<b>\$574</b>	<b>\$6,627</b>	<b>\$14,867</b>		

Actual maturity may differ from contractual maturity because certain borrowers have the right to call or prepay certain obligations with or without call or prepayment penalties.

c) Equities

The Plan's equity investments are held as portfolio investments and are generally readily marketable. Investments are generally limited to stocks that are publicly traded on a recognized securities market. The Plan's equities include common shares that have no fixed maturity dates and are generally not directly exposed to interest rate risk. Dividends are generally declared on a quarterly basis. The average effective dividend rate is 2.08% (2009 – 2.46%).

The Plan's investment policy allows any single holding to represent no more than 10% of the fair value of the related portfolio and any single holding to represent no more than 10% of the common stock in any corporation.

d) Pooled funds

The Plan limits its investments in pooled equity funds to 10% of the market value of each fund. The Plan owns units in pooled equity funds which have no fixed interest rate and whose return is based on the success of the fund manager. Exceptions to the 10% limit are allowed if provision has been made to transfer securities in kind out of the pooled fund when assets are transferred out of the pooled fund.

The Plan's pooled funds are comprised of the following:

	<u>2010</u>	<u>2009</u>
	(thousands of \$)	
Global Equity Fund	\$5,079	\$4,163
US Equity Fund	4,890	4,614
	<u>\$9,969</u>	<u>\$8,777</u>

e) Determination of fair value

The determination of fair value is based on valuations that make maximum use of available market information. The best measure of fair value is an independent quoted market price for the same instrument in an active market. An active market is one where quoted prices are readily available representing regularly occurring transactions. Fair value measurements are categorized into levels within a fair value hierarchy based on the nature of the inputs used in the valuation. The three levels of the fair value hierarchy are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 Inputs that are not based on observable market data.

The Plan presently holds only financial instruments that are classified as Level 1.

#### 4. Due from General Revenue Fund

The Plan's bank account is included in the Consolidated Offset Bank Concentration arrangement for the Government of Saskatchewan.

The Plan's earned interest is calculated and paid by the General Revenue Fund on a quarterly basis into the Plan's bank account using the Government's thirty day borrowing rate and the Plan's average daily bank account balance. The Government's average 30-day borrowing rate in 2010 was 0.60% (2009 – 0.47%).

## 5. Employer Contributions

As at January 1, 2010, the Board was required to make annual contributions of \$70,716 for three years to fund a solvency deficiency in the Plan. The WCB had been required to take a holiday on employer contributions as the Plan had an excess actuarial surplus. This was required by Section 147.2 (2) of *The Income Tax Act*.

## 6. Accrued Pension Benefits

Accrued pension benefits are determined using the projected benefit method pro-rated on service and management's best estimate assumptions approved by the WCB of expected plan investment performance, discount rate, salary escalation, inflation rate, post-retirement indexing rate and retirement ages of employees. The actual results may vary significantly from the long-term assumption used. The most recent actuarial valuation was prepared as at December 31, 2009 and extrapolated to December 31, 2010 by The Segal Company, Ltd.

The assumptions used in determining the actuarial value of accrued pension benefits were:

	<u>2010</u>	<u>2009</u>
Discount rate	4.50%	5.85%
Expected long-term rate of return on plan assets	4.50%	5.85%
Salary escalation rate	3.25%	3.25%
Inflation rate	2.25%	2.25%
Remaining service life of active members in years (EARSL)	1	2

The accrued pension benefits contain a provision for pension increases of the lesser of 2.5% and 50% of the rate of increase, if any, in the year over year increase in the Consumer Price Index in the twelve month period ending September 30 each year.

The discount rate selected is based upon the rate of return that would be obtained in a portfolio of high quality corporate bonds with cash flows matching the anticipated duration of the accrued pension benefits. During the current year the plan changed the discount rate being used based upon changes to market interest rates. The result of this change was to increase the accrued pension benefit by \$4.6 million.

The following illustrates the effect of changing certain assumptions:

	Long Term Assumptions							
	Inflation*		Salary		Discount Rate		Post Retirement Indexing	
	+ 1.0%	- 1.0%	+ 1.0%	- 1.0%	+ 1.0%	- 1.0%	+ 0.5%	- 0.5%
Increase (decrease) in liability	(5.5%)	6.1%	0.1%	(0.1%)	(10.1%)	12.2%	2.7%	(2.6%)

\* A change in the inflation rate of 1% has a corresponding change in the discount rate of 1%, in the salary scale of 1% and in the post retirement indexing of 0.5%.

If there are insufficient funds in the Plan to pay pension benefits, the WCB is obligated to pay any such deficiency to the Plan.

## 7. Financial Risk Management

The nature of the Plan's operations results in a statement of net assets available for benefits, accrued pension benefits and deficit that consists primarily of financial instruments. The risks that arise are credit risk, market risk (consisting of interest rate risk, foreign exchange risk and equity price risk) and liquidity risk.

Significant financial risks are related to the Plan's investments. These financial risks are managed by having an investment policy, which is approved annually by the Board. The investment policy provides guidelines to the Plan's investment managers for the asset mix of the portfolio regarding quality and quantity of fixed income and equity investments. The asset mix helps to reduce the impact of market value fluctuations by requiring investments in different asset classes and in domestic and foreign markets.

The Board reviews regular compliance reports from its investment managers as to their compliance with the investment policy. The Board also reviews regular compliance reports from the custodian as to the investment manager's compliance with the investment policy.

### Credit risk

The Plan's credit risk arises primarily from two distinct sources: accounts receivable and certain investments. The maximum credit risk to which it is exposed at December 31 is limited to the carrying value of the financial assets summarized as follows:

	<u>2010</u>	<u>2009</u>
	(thousands of \$)	
Cash	\$ 27	\$ 53
Receivables	128	131
Fixed income investments <sup>1</sup>	16,204	16,007
Due from the General Revenue Fund	156	57

<sup>1</sup> Includes short-term investments, and bonds and debentures

Accounts receivable is primarily made up of accrued investment income. Accrued investment income is received on the next scheduled payment date, generally either annually or semi-annually.

Credit risk within investments is primarily related to short-term investments, and bonds and debentures. It is managed through the investment policy that limits debt instruments to those of high credit quality (minimum rating for bonds, BBB, and for short-term investments is R-1) along with limits to the maximum notional amount of exposure with respect to any one issuer.

Credit rating for bonds and debentures are as follows:

Credit Rating	2010		2009	
	Fair Value (thousands of \$)	Makeup of Portfolio (%)	Fair Value (thousands of \$)	Makeup of Portfolio (%)
AAA	6,607	45.0	5,958	40.1
AA	4,044	27.5	4,550	30.6
A	3,199	21.8	3,577	24.0
BBB	839	5.7	782	5.3
Total	<u>14,689</u>	<u>100.0</u>	<u>14,867</u>	<u>100.0</u>

Within bonds and debentures, there are no holdings from one issuer, other than the Government of Canada or a Canadian province, over 6.89% (2009 – 4.1%) of the market value of the combined bonds and debentures and short term investment portfolios. No one holding of a province is over 4.7% (2009 – 5.1%) of the market value of the bond and debenture portfolio.

## Market risk

Market risk represents the potential for loss from changes in the value of financial instruments. Value can be affected by changes in interest rates, foreign exchange rates and equity prices. Market risk primarily impacts the value of investments.

### Interest rate risk

The Plan is exposed to changes in interest rates in its fixed income investments, including short-term investments and bonds and debentures. Duration is a measure used to estimate the extent market values of fixed income instruments change with changes in interest rates. Using this measure, it is estimated that a 100 basis point change in interest rates would change net assets available for benefits and deficit at December 31, 2010 by \$0.96 million (2009 - \$1.0 million) representing 6.5% (2009 – 6.9%) of the \$14.7 million (2009 - \$14.9 million) fair value of bonds and debentures.

### Foreign exchange risk

The Plan is subject to changes in the U.S./Canadian dollar exchange rate for U.S. denominated investments. Also, the Plan is exposed to EAFE (Europe, Australasia and Far East) currencies through its investment in a global equity pooled fund. Exposure to both U.S. and non-North American pooled equity funds and equities is limited to a combined maximum of 32% of the market value of the total investment portfolio. At December 31, 2010, the Plan's exposure to U.S. equities was 13.6% (2009 – 13.4%) and its exposure to a non-north American pooled equity fund was 14.1% (2009 – 12.1%) for a total exposure of 27.7% (2009 – 25.5%).

At December 31, 2010, a 10% change in the Canadian dollar versus U.S. dollar exchange rate would result in approximately a \$0.5 million (2009 - \$0.5 million) change in net assets available for benefits and deficit. A 10% change in the Canadian dollar versus the EAFE currencies would result in approximately a \$0.5 million (2009 – \$0.4 million) change in net assets available for benefits and deficit.

### Equity price risk

The Plan is exposed to changes in equity prices in Canadian, U.S. and EAFE markets. Equities and pooled equity funds comprise 55.0% (2009 – 53.3%) of the carrying value of the Plan's total investments. Individual stock holdings are diversified by geography, industry type and corporate entity. No one investee or related group of investees represents greater than 5.1% (2009 – 6.99%) of the market value of the Plan's common share portfolio. As well, no one holding represents more than 10% (2009 – 10%) of the voting shares of any corporation.

The following table indicates the approximate change that could be anticipated to both the increase in net assets available for benefits and deficit based on changes in the Plan's benchmark indices at December 31, 2010:

	(Change in thousands of \$)	
	<u>10% increase</u>	<u>10% decrease</u>
S&P/TSX Composite Index	\$985	\$(985)
S&P 500 Index	489	(489)
MSCI EAFE Index	508	(508)

## Liquidity risk

Liquidity risk is the risk that the Plan is unable to meet its financial obligations as they fall due. Cash resources are managed on a daily basis based on anticipated cash flows.

## 8. Related Party Transactions

Included in these financial statements are transactions with various Saskatchewan Crown corporations, ministries, agencies, boards and commissions related to the Plan by virtue of common influence by the Government of Saskatchewan. As at December 31, 2010, the Plan held \$437,962 (2009 – \$384,876) in Government of Saskatchewan bonds with net earnings of \$45,234 (2009 - \$19,476).

Certain administration expenses are paid by the Plan to the Public Employees Benefits Agency Revolving Fund based upon agreed exchange amounts. The amount is identified in Note 10. Included in accounts payable is an amount of \$1,246 (2009 - \$4,518) payable to the Public Employees Benefits Agency Revolving Fund.

## 9. Investment Performance

The investment manager makes day-to-day decisions on whether to buy or sell investments in order to achieve the long-term performance objectives set by the Board. The Board reviews the investment performance of the Plan in terms of the performance of the benchmark portfolio over 4 year rolling periods. The primary long-term investment performance objective for the entire portfolio is to outperform a benchmark portfolio.

The following is a summary of the Plan's investment performance:

	Annual Return		Rolling Four-Year Average Annual Return	
	2010	2009	2010	2009
Plan's actual rate of return	10.6%	13.7%	2.9%	3.3%
Target rate of return	9.0%	13.5%	2.5%	3.1%

The annual returns are before deducting investment expenses.

## 10. Administration Expenses

	2010	2009
	(Thousands of \$)	
Administration - PEBA Revolving Fund	\$ 102	\$ 48
Custodial fees - RBC Dexia Investor Services Trust	23	30
Investment management fees – Greystone	52	48
	<u>\$ 177</u>	<u>\$ 126</u>

## 11. Fair Value of Financial Assets and Financial Liabilities

For the following financial assets and liabilities the carrying amounts approximate fair value due to their immediate or short-term nature.

- Cash
- Accrued investment income
- Due from General Revenue Fund
- Accounts payable and accrued liabilities

Fair value of investments are disclosed in note 3.

---

The fair value of accrued pension benefits has not been determined because it is not practical to determine fair value with sufficient reliability, as this estimate is subject to uncertainty and varies according to the uncertainty inherent in the assumptions. Information about the estimated accrued pension benefits is provided in note 6.

## **12. Comparative Figures**

Certain prior year comparative figures have been reclassified to comply with the current year presentation.
