	100.0

How has the fund performed?

This section illustrates how the fund has performed over the past 10 years. Returns are after the deduction of all expenses.

A \$1,000 investment made into the fund 10 years ago, would be worth **\$2,276** as of June 30, 2019, a compound annualized return of 8.6%.

Annual Returns** (as of June 30, 2019)

How risky is it?[§]

Each PEPP investment option has some level of short-term and long-term risk associated with it.

In the short-term, some investments may increase or decrease in value quickly and dramatically. This fluctuation in value is referred to as volatility.

In the long-term, some investments might not produce investment returns sufficient for your retirement income. Generally, investments with lower short-term volatility also have lower long-term returns. On the other hand, investments with higher short-term volatility are expected to produce higher long-term returns.

As an investor, you should balance these risks based on your own investment goals and investment risk tolerance.

^^ ER represents the total expenses to operate the fund as at March 31, 2019.

** Past fund performance is not necessarily indicative of future fund performance. Investment returns vary over time and as such, no guarantees are applicable to the rates of return.

Who is this fund for?

This fund may be an appropriate investment option for Plan members who are aggressive investors or for younger Plan members who have a longer time horizon for their retirement savings plan. This fund may not be appropriate for some pensioners or conservative investors. Investors choosing this fund will need to be comfortable with the periods of low or negative returns that may occur. This investment option experiences relatively high expected volatility risk and the potential for relatively high returns.

Before making any investment decisions you should complete the *My PEPP Investor Profile* to ensure your investment decision matches your investment style.

What are the fees?

You do not pay fees directly. Fees for actual costs are deducted from the fund prior to declaring a unit value.

Ongoing fund expenses*

The actual fees associated with the investment and operation of the fund are billed directly to the fund. The following table shows a breakdown of the estimated 0.50% Expense Ratio.

Investment Fees	the amount paid to investment managers, custodians and consultants	0.42%
+ Operating Expenses	the costs to administer the Plan	0.08%
= Expense Ratio	the total costs	0.50%

* As at March 31, 2019

Other fees

There may be some additional fees associated with your account in the event you wish to transfer monies in your account to another fund within PEPP.

Manual Inter-fund transfers in excess of two per fiscal year \$30

No other fees are associated with the investment of your PEPP account.
